

Web Development

SaaS Solution

Tech Startup

About us:

Prospeum rethinks the way companies manage B2B relationships.

We're creating a core piece of enterprise software for corporations and SMEs, to collaborate across departments to create project and innovation solicitations and auctions.

Our solution empowers our customers to easily establish more streamlined procurement processes, perform advanced sourcing evaluations and ultimately take better business decisions.

Content of your work:

You will be working closely with us on the frontend (based on **Angular 6**) of Prospeum which is at the heart of the project.

Following your specific interests, you can join us in:

- developing different modules from scratch
- iterating and improving the UX and UI
- GUI testing

The role may be undertaken as:

- internship
- working student position
- freelance job
- university project

What we look for:

- Experience in UI/UX design
- Experience in web development, preferably Angular or possibly React.js
- Experience with Git
- Diligence, open-mindedness, interest in B2B SaaS applications

Our offer:

- Help us to change and accelerate worldwide business and revolutionize a \$5bn market
- A very experienced international and interdisciplinary team
- Flexibility. We discuss deadlines and objectives together and your timetable is yours
- Experience in working in an early tech startup. An indispensable experience for aspiring entrepreneurs
- Shape the company with your innovative ideas and solutions and possibly join us, early on
